Appliances that deliver optimal efficiency are a must-have for any home, particularly those that save energy while increasing convenience, such as the Filtrata 4-in-1 Boiling Water Tap. The Filtrata provides ingenious 4-in-1 technology at the push of a button, offering standard hot and cold water as well as filtered cold water and boiling water.

The Lusso Filtrata comes in four styles and five finishes, ensuring that there is a design and finish to complement both modern and traditional settings. Popular within residential and commercial spaces, the Filtrata is engineered with a 360-degree swivel spout and two levers to separate its functions. It also ensures complete safety and ease of use, which is particularly advantageous for households with children.

To reduce consumption, the tap design also provides the right amount of hot water as and when it's needed, whereas the average household that's reliant on a kettle is likely to boil four times the amount of water required with each use. As well as helping to save water and energy, the Filtrata can elevate the aesthetic of a kitchen by freeing up valuable countertop space that would otherwise be needed to store a kettle.

FILTRATA FILTRO 4 IN 1 BOILING WATER TAP

£595.00

Our original Filtrata model, defined by a classic swan neck spout.

The perfect addition to any modern or traditional kitchen.

Ultra contemporary, the Filtrata 101 features a modern square neck spout and diamond knurling.
