

LUSSO

CLEANING & CARE

CORTESE™ STONE

MATTE FINISH

We recommend that the products should be cleaned regularly with warm soapy water. Preferably the product should be cleaned immediately after use, rinsed with water and dried with a soft cloth.

Cleaning products can be used but please follow the instructions on the packaging of your chosen cleaner.

For stubborn stains we recommend using a cream cleaner such as CIF or AJAX. We strongly recommend that you use the Wet & Dry sandpaper pad to give the bath a deep clean at least once a month. The sandpaper pad will remove all stubborn stains and fine scratches. Use the pad with plenty of warm soapy water. If you have misplaced or you need a new sandpaper pad, you can find these in most major DIY stores.

DO NOT

—
Use concentrated bleach.
Use tar based shampoo.

REPAIRING YOUR MATTE PRODUCT

Surface scratches and chips can be polished out using various grades of sandpaper depending on the depth of the scratch/chip. Once the scratch or chip has gone, you will need to smoothen it off using the fine grade sandpaper that was supplied with your product.

POLISHED FINISH

We recommend that the products should be cleaned regularly with warm soapy water. Preferably the product should be cleaned immediately after use, rinsed with water and dried with a soft cloth. Cleaning products can be used but please follow the instructions on the packaging of your chosen cleaner.

For stubborn stains we recommend using a polishing kit which can be purchased from most major DIY stores.

DO NOT

—
Use scouring powders/pads or abrasive cleaners.
Use vinegar, lemon juice or other cleaners containing acids.
Use concentrated bleach.
Use tar based shampoo.

REPAIRING YOUR POLISHED PRODUCT

LIGHT SURFACE SCRATCHES

It is possible to remove these using a stone polishing kit which can be purchased from most major DIY stores.

DEEP SCRATCHES AND CHIPS

We recommend that you use a professional stone mason.
