LUSO LIGHT

CLEANING & CARE GUIDE

ABOUT LUSSO LIGHT

Our exclusive Lusso Light material is a durable, smooth, and seamless acrylic carefully crafted for longevity. After years of development and refinement, this innovative and lightweight material mirrors the luxury design and reassuring thickness of our natural stone pieces. The Lusso Light Collection consists of designs suited to both traditional and contemporary interiors. Available in polished and matte finishes, the soft white hue of each design is a versatile match for all colour palettes.

WHAT TO EXPECT WITH LUSSO LIGHT

Lusso Light baths offer the convenience of lightweight material while upholding the signature qualities that Lusso is renowned for - timeless design and exceptional craftsmanship. The enduring material has been meticulously developed to mirror the look and finish of our Cortese® Stone to provide attainable luxury for homes of all shapes and sizes. Lusso Light baths weigh between 33kg to 57kg making them extremely easy to install.

CLEANING & CARE

Although a luxury, durable and superior material, Lusso Light baths require regular cleaning to extend their longevity for years to come. The bath needs to be warm to allow effective cleaning, so you can choose to clean immediately after use, when the water has drained from the tub, or if cleaning when the bath is cold you will need to do some preparation first.

Begin by filling the bathtub with 3 to 4 inches of hot water, ensuring coverage of the bath walls. Allow the water to sit for a few minutes before draining it so your bath is heated and prepared for cleaning.

Apply a non-abrasive cleaner to the interior of the bath and allow it to sit for 3 to 5 minutes before using a microfibre cleaning cloth to gently scrub the surface. Lastly, rinse the surface with hot water and dry with a soft cloth.

MAINTAINING YOUR LUSSO LIGHT TUB

Lusso Light is crafted from a gentle acrylic material that requires routine maintenance to uphold its impeccable condition. We advise cleaning the tub after each use, or at least once weekly, using a non-abrasive cleaner and water solution to avoid mildew build-up and stubborn stains. We also recommended using a drain cleaner to prevent any potential blockages.

WHAT SHOULD I AVOID?

As acrylic is at risk of scratching staining, we recommend avoiding abrasive cleaners that contain harsh chemicals. We also advise avoiding abrasive scrubbing pads and steel wool, as they have the potential to cause damage to the surface. Instead, we suggest cleaning with soft microfiber cloths and sponges. Lastly, you should never smoke near the acrylic bath, as this can cause permanent damage and discoloration.

HOW DO I REMOVE SCRATCHES AND STAINS?

Due to its composition, acrylic tends to react with harsh and abrasive cleaners, which can damage the surface and cause scratches. If scratches are visible on your acrylic tub, they can be removed with a liquid polisher and a damp sponge.

Different types of stains can become apparent on acrylic surfaces, including rust, general dirt stains, and yellow stains caused by hard water. To remove harsh stains we recommend using a cleaning product designed to remove stains from acrylic products. Simply, apply the stain remover solution over the affected surfaces, and leave it for an hour. Rub the stains with a soft sponge, then wipe the entire tub followed by a rinse of clean water. Your acrylic bath should then be back to its original state. Some stains may prove difficult to remove, use a soft-bristled brush to remove tough spots without causing damage to the surface. If the stain persists, professional cleaning may be required.
